The invention claimed:

1. A vendable delivery article, comprising:

a vendable prize delivery mechanism with a currency slot for the insertion of local market currency where the promotion is being done;

the vendable prize delivery mechanism of a size and shape like that of a primary product container that is customarily delivered to a consumer by a vending machine, having an opening to an interior for receiving a premium; and

a removable section to allow insertion of the premium into the interior.

- 2. The vendable delivery article of claim 1, wherein the vendable prize delivery mechanism resembles a beverage can.
 - 3. The vendable delivery article of claim 1, wherein the vendable prize delivery mechanism resembles a beverage bottle.
- 4. The vendable delivery article of claim 1, wherein the removable section comprises a weighted removable bottom section.
 - 5. The vendable delivery article of claim 1, further comprising material covering the currency slot.

25

5

- 6. The vendable delivery article of claim 1, wherein the premium can be accessed by unscrewing the removable section.
- 7. The vendable delivery article of claim 1, wherein the premium can be accessed by snapping apart the removable section.
 - 8. The vendable delivery article of claim 1, wherein the vendable prize delivery mechanism is sufficiently transparent so that the consumer can see the premium without opening the removable section.
 - 9. The vendable delivery article of claim 1, wherein the vendable prize delivery mechanism is branded similar to the primary product container.
- 10. The vendable delivery article of claim 1, further comprising a carrier that provides the vendable prize delivery mechanism with sufficient rigidity to withstand being placed in a column of primary product containers without degradation of the vendable prize delivery mechanism.
- 20 11. The vendable delivery article of claim 1, further comprising a weighted carrier to encapsulate the premium.
 - 12. The vendable delivery article of claim 1, further comprising weighted interlocking components to hold the premium.

5

10

13. The vendable delivery article of claim 12, wherein the weighted interlocking components comprise a carrier plug shaped to conform to an inner bottom surface of the primary product container.

14. A method for delivering a vendable delivery article via a vending machine, comprising the steps of:

manufacturing a vendable prize delivery mechanism with a currency slot,

assembling the vendable prize delivery mechanism by placing the premium into an interior region of the vendable prize mechanism;

shipping the vendable prize delivery mechanism;

inserting into the currency slot a proper local currency in the type and amount dictated by the local specific primary product cost into the vendable prize delivery mechanism; and

placing the local vendable prize delivery mechanism into a local vending machine.

- 15. The method of claim 14, wherein the vendable prize delivery mechanism resembles a beverage can.
- 16. The method of claim 14, wherein the vendable prize delivery mechanism resembles a beverage bottle.
- 20 17. The method of claim 14, wherein the vendable prize delivery mechanism comprises a weighted bottom section.
 - 18. The method of claim 14, further comprising the step of covering the currency slot.

5

10

15

- 19. The method of claim 14, wherein the premium can be accessed by unscrewing a removable section.
- 20. The method of claim 14, wherein the premium can be accessed bysnapping apart a removable section.
 - 21. The method of claim 14, wherein the vendable prize delivery mechanism is sufficiently transparent so that the consumer can see the premium without opening a removable section.

10

25

22. The method of claim 14, wherein the vendable prize delivery mechanism is branded similar to a primary product container customarily vended by the local vending machine.

- 15 23. The method of claim 14, wherein the vendable prize delivery mechanism has sufficient rigidity to withstand being placed in a column of primary product containers without degradation of the vendable prize delivery mechanism.
- 24. The method of claim 14, further comprising inserting a weighted carrier that holds the premium into the vendable prize delivery mechanism.
 - 25. The method of claim 14, further comprising inserting into the vendable prize delivery mechanism weighted interlocking components to hold the premium.

- 26. The method of claim 25, wherein the weighted interlocking components comprise a carrier plug shaped to conform to a inner bottom surface.
- 5 27. The method of claim 14, further comprising the step of sealing the mechanism by shrink-wrapping prior to shipping.

10

15

28. The method of claim 27, further comprising the step of covering the currency slot.

29. A method for delivering a vendable delivery article, comprising the step of placing a vendable prize delivery mechanism with a currency slot into a vending machine.
